Group I: Concepts, Processes and Patents

6

- Concept such as propounding a new theory or describing pathways and mechanisms of a process. In case of social sciences, the concept may include new approaches/tools such as total factor productivity, social business and meta-evaluation.
- Process such as development and description of steps/components of a process that explain the total mechanism of operation. These may also include development of new extension methodologies, methods of conservation agriculture, development of innovative methodologies for research prioritization and technology impact assessment and applications of new concepts.

Marks should be allotted based on credible evidence either published in journal with at least 15 number of citations or included in a reputed text book or referred to in important planning and policy documents. Complete reference of the published papers or books or planning and policy documents should be provided.

Each concept and process scores 1 mark.

Since difference between concept and process is thin, double counting should be avoided.

- Patents granted with details of Patent No., Accession No., Trade Marks for GI, Germplasm Registration and IP protection should be provided.

Each patent scores 1 mark

Group II: Products and Technologies

10

- **Products:** Development of new products (eg. variety, unique germplasm, genetic stock, chemical and biochemical formulation, diagnostics, vaccines, drug formulation, feed formulation, models of institutional innovations, programming, simulation or statistical models and computer software, including extension software such as expert systems and interactive multimedia, new pest and pathogen identified, new machines/equipment or major modifications in them and development of new value-added/processed products) that have been economically evaluated and adopted or have the potential to be adopted on a wide scale. In the case of social sciences, it may include special reports, policy papers, etc. with evidences of influence on research priorities, economic policies and programmes.
- **Technologies:** Research findings that become sustainable practices among the stakeholders. These include integrated pest management, integrated resource management, integrated farming system models, water harvesting and conservation methods, post-harvest technologies, institutional innovations animal improvement and innovative extension efforts leading to large scale diffusion and adoption of technologies.

Documentary evidence should be enclosed for the adoption of products and technologies and their impact on livelihood of farmers/commercial value and acceptance by clients/stakeholders.

Each product, variety and technology adopted in large scale by farmers/clients/stakeholders and made significant impacts scores 2 marks

Each product, variety and technology adopted in ICAR/CSIR/ICMR Institutes/SAUs or entered in multi-location trials for validation, including socio-economic feasibility scores 1 mark

In outstanding cases where an extraordinary contribution such as development of a product/technology which has made large scale impact either at national or international level, for example development of Swarna and Mahsuri varieties of rice and zero-till drill, the Committee may award as much high marks as possible after critical examination of the claims of the nominee vis-a-vis co-workers. Such recommendations must be brought to the attention of the joint meeting of the conveners for ratification.
